

An aerial photograph of a large-scale construction project. A massive blue lattice boom crane is the central focus, extending from the bottom left towards the top right, over a large body of turquoise water. The construction site below is filled with concrete structures, rebar, and various pieces of construction equipment. The scene is captured from a high angle, showing the scale of the project.

# Forward-Looking Information

The information in this presentation includes certain forward-looking statements. Although these forward-looking statements are based on currently available competitive, financial and economic data and operating plans, they are subject to risks and uncertainties. In addition to events beyond Aecon's control, there are factors which could cause actual or future results, performance or achievements to differ materially from those expressed or inferred herein including risks associated with an investment in the common shares of Aecon and the risks related to Aecon's business. Such factors include but are not limited to: the timing of projects, unanticipated costs and expenses, the failure to recognize and adequately respond to climate change concerns or public and governmental expectations on climate matters, general market and industry conditions and operational and reputational risks, including large project risk and contractual factors, and risks relating to the COVID 19 pandemic and associated entitlements under government assistance programs. Risk factors are discussed in greater detail in the section on "Risk Factors" included in the Management Discussion and Analysis filed on October 29, 2020 and in the Annual Information Form filed on March 30, 2020, both of which are available on SEDAR at [www.sedar.com](http://www.sedar.com).

Forward-looking statements may include, without limitation, statements regarding the operations, business, financial condition, expected financial results, performance, prospects, ongoing objectives, strategies and outlook for Aecon. Forward-looking statements may in some cases be identified by words such as "will", "plans", "believes", "expects", "anticipates", "estimates", "projects", "intends", "should" or the negative of these terms, or similar expressions. Other important factors, in addition to those discussed in this document, could affect the future results of Aecon and could cause its results to differ materially from those expressed in any forward-looking statements. Except as required by applicable securities laws, forward-looking statements speak only as of the date on which they are made and Aecon undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

# Diverse and Valuable Concessions Portfolio

## The Aecon Value Proposition

- ✓ Proven capability to develop, construct, finance and operate diverse infrastructure concessions in Canada and internationally
- ✓ Solutions-based, partner of choice to international construction firms, governments and financial institutions
- ✓ Leader in technology and systems integration in transit, tolling and airport infrastructure as well as innovative financing models
- ✓ Provides for stable, long-term cash flow opportunity with flexibility to monetize interests for future development projects

### Bermuda L.F. Wade International Airport

- 100% equity ownership and concession
- Development and construction of new US\$274 MM terminal – now substantially complete
- Commercial operations resumed July 2020 after temporary suspension due to COVID-19
- New terminal opened on December 9, 2020
- 30 year operations and maintenance concession to 2047
- Upside opportunity through increased air traffic and ancillary fees

### Canadian LRTs

- 30 year maintenance concessions on Eglinton, Finch and Waterloo LRTs
- Availability-based payments from provincial transit counterparties
- Proven team currently bidding on Canadian transit projects in procurement

### Gordie Howe International Bridge

- 30 year operations and maintenance concession
- Availability-based payments from Canadian Federal Government

# Outlook

- Aecon's operations continue to be impacted by the COVID-19 pandemic, either by client decisions related to schedules or operating policies or due to broader government directives to modify work practices to meet relevant health and safety standards.
- In particular, during the fourth quarter, nuclear operations are expected to only be in the ramp up phase rather than full run rate for the next stage of work on a number of projects that were originally scheduled to start earlier in the year but were delayed due to COVID-19.
- In the Concessions segment, commercial operations at the Bermuda International Airport continue to recover slowly due to COVID-19 related travel restrictions which have significantly impacted the aviation industry. The new Bermuda International Airport terminal opened for operations on December 9, 2020, which marks a significant milestone for the Company.
- While the primary impact from COVID-19 will be to reduce revenue across a number of areas of Aecon's business until normal operations fully resume, there is no guarantee that all related costs will be recovered and therefore it is possible that future project margins could be impacted.
- The current backlog and level of new awards year-to-date have remained strong with backlog of \$6.7 billion at the end of the third quarter of 2020, which was \$107 million higher than the same time last year. To date, no projects that were previously recorded in Aecon's backlog have been cancelled due to COVID-19. The Company expects that demand for its services will remain strong following the COVID-19 pandemic as the federal government and provincial governments across Canada have identified investment in infrastructure as a key source of economic stimulus as part of the recovery plan.
- Aecon's financial position, liquidity and capital resources remain strong, and are expected to be sufficient to finance its operations and working capital requirements for the foreseeable future.
- As a Canadian employer whose business has been affected by COVID-19, Aecon expects to continue its participation in the CEWS program throughout the program's duration, subject to meeting the applicable eligibility requirements.
- The overall outlook for 2020 remains solid and 2021 is expected to be a strong year as construction continues on a number of projects that have ramped up in 2019 and 2020, the strong level of new awards in 2020, and the strong demand environment for Aecon's services, all subject to the unknown impacts of COVID-19 going forward.
