

AECON ATLANTIC INDUSTRIAL INC.

Aecon Atlantic Industrial Inc. is a full service multi-trade unionized fabricator / constructor with self-performing expertise in all industrial trades, complimented by the largest pipe fabrication and modular assembly facilities in Eastern Canada. The company has distinguished itself as a world-class supplier to a number of diversified market sectors including:

- // Industrial construction
- // Power generation
- // Ship repair, refits and conversions
- // Offshore
- // Oil and gas
- // Petrochemical
- // Pulp and paper
- // Mining
- // Renewable energy

Aecon Atlantic Industrial Inc. offers a wide range of modular assemblies using the newest design techniques. In addition to custom pre-fabricated pipe spools, our modules can incorporate a broad range of components including valves, instrumentation, cable tray and cable equipment, structural supports, and more, all available packaged for improved project delivery.

Pictou Shipyard

The Pictou Shipyard is a full-service, multi-trade, unionized fabricator/constructor with an unrivalled reputation for performing projects safely, on-time and on-budget. The Pictou Shipyard is a cost-effective and efficient leader in providing industrial marine services.

Marine Facility Overview

Aecon offers top-to-bottom refurbishment and repair through the careful management of our own workforce

and trusted subcontractors. Marine facility features include the following:

- // 24 tons per ft. keel block loading
- // 4,000-ton capacity marine railway
- // 305 ft. overall length
- // Ability to work on multiple large vessels at one time
- // Dockside services
- // 300 ft. wharf & 600-ft. wharf
- // 30 ft. water depth alongside
- // Strategically located near shipping routes
- // Skilled labour force
- // 24/7 security
- // ISO9001:2008 certified
- // Sideyard transfer – multiple vessel capability
- // Allows vessels to be moved off railway to shore, and back to water, in an arrangement different from the hauling sequence.
- // Repair work can be done simultaneously on multiple vessels and emergency dockings can be handled more easily.
- // Convenient location on major international shipping routes and eastern seaboard.
