

# AECON CONSTRUCTION AND MATERIALS LTD. (ACML)

**Aecon Construction and Materials Ltd. builds complex highway infrastructure, airfield projects, residential and commercial developments, landfills, bridges and other major types of infrastructure projects.**

We pride ourselves in meeting production schedules, exceeding quality standards, working safely and maximizing value for our clients. Based in Ontario, our civil construction team supports major project efforts across Canada.

**Some of our core services include:**

- // Bridge construction
- // Major excavation work
- // Tunnel construction
- // Highway pavement construction
- // Sewer and water main construction
- // Marine projects
- // Environmental remediation projects
- // Winter road maintenance
- // Concrete slip-forming

Work is accomplished through design-build contracts, joint ventures and value engineering. We have a history of successfully completing large complex projects in the development of major Canadian infrastructure.
