

INDUSTRIAL - UTILITIES

Aecon Utilities is committed to delivering projects. We simply do it better. We are Ontario's premier utility contractor, and are ready to become Canada's premier utility construction provider.

Driven by a company-wide commitment to providing the highest quality construction services, on-time and within budget, we continue to evolve in a changing market.

Aecon Utilities offers the following construction services across Canada:

- // Telecommunication infrastructure
- // Gas pipelines
- // Fiber optic networks
- // Power distribution networks
- // District and renewable energy
- // Water distribution and sewer collection systems

TELECOMMUNICATIONS

A trusted division of Aecon Utilities specializing in splicing, civil, and line works. Aecon Telecommunications has a long history with key clients, and has master service agreements secured for years to come.

AECON UTILITY ENGINEERING (AUE)

Aecon's in-house engineering team supports construction and provides value-added Quality Management Assurance Programs to our clients. AUE is pre-approved by many clients for self-locates, reducing construction delays and damage to existing utilities.
