

GROUPE AECON QUÉBEC LTD.

Groupe Aecon Québec Ltd. is a major player in heavy civil work in Québec.

Over the years, Groupe Aecon Québec Ltd. has been involved in many large hydroelectric projects including the Sainte-Marguerite 3 underground power-house, the Toulnostouc Dam and the Eastmain Powerhouse. Also in our portfolio of projects are important bridge projects such as the expansion and replacement of Carbonneau bridge in St-Félicien, and the St-Jacques bridge in Montreal. Other notable projects include the Décarie Highway and paving of Highway 132, as well as a tunnel design-build project for the Petro-Canada refinery.

Groupe Aecon Québec Ltd. has also been involved with civil projects at industrial sites such as the Alcan aluminum plant in Alma and Interquisa PTA plant in Montréal.

Groupe Aecon Québec Ltd. was a partner in the P3 construction joint venture for the completion of Highway A30 and was also a partner on many large design-build hydroelectric projects in Northern Ontario, including the Lower Mattagami River project.
